

Dual Junction Circulator with 40 dB Isolation from 1.7 GHz to 2.2 GHz, 50 Watts and N Female

Circulators Technical Data Sheet

PE83CR1016

Features

- Dual-Junction Circulator
- Frequency Range of 1.7 to 2.2 GHz
- Female N Connectors

- Low VSWR
- · Forward and Reverse Power of 50 Watts

Applications

- · Radar Systems
- Military
- · Wireless Radio Systems
- Telecom Infrastructure
- Communication Systems
- R&D Labs

Microwave Radio Systems

Description

The PE83CR1016 is a dual junction circulator offering 36 dB minimum isolation over a frequency band of 1.7 to 2.2 GHz. This coaxial part uses N female connectors on all ports and has a power rating of 50 Watts in the forward and reverse direction.

Pasternack offers a wide variety of circulators to fit your needs. These unique devices enable two signals to use a single channel. The classic use of a circulator (a three port device) is for the line/coax between the antenna and a transceiver, allowing the signal to come from the antenna to the receiver while the transmit signal goes from the transmitter to the antenna. As a dual junction device, this is essentially two circulators in one package and has four ports. This allows for roughly twice the isolation of a standard circulator. By terminating one of the four ports (using a 50 ohm load), it becomes a three port device and can be connected as a standard circulator. An isolator can be created by terminating another port, creating a two port device. These devices can be used in antenna transmitting and receiving, radar, amplifier systems and anything that requires isolation from a signal reflection and the ability to send signals in opposite directions down a single channel. These circulators feature excellent insertion loss, high isolation and reliability.

Electrical Specifications

Description	Minimum	Typical	Maximum	Units
Frequency Range	1.7		2.2	GHz
Impedance		50		Ohms
Insertion Loss			0.8	dB
Dual Junction Isolation (ports 2-1, 4-3)	40			dB
Single Junction Isolation (ports 1-4, 3-2)	15			dB
VSWR			1.25:1	
Forward Power, CW			50	Watts
Reverse Power, CW			50	Watts

Electrical Specification Notes: Values at 25°C, sea level.
